

INNOVATION

CLEAN LED 1.0

TECHNOLOGY

In just one product the power of light and oxygen provides a healthy room atmosphere in living and work places.

Profit
from our **CLEAN LED 1.0!**

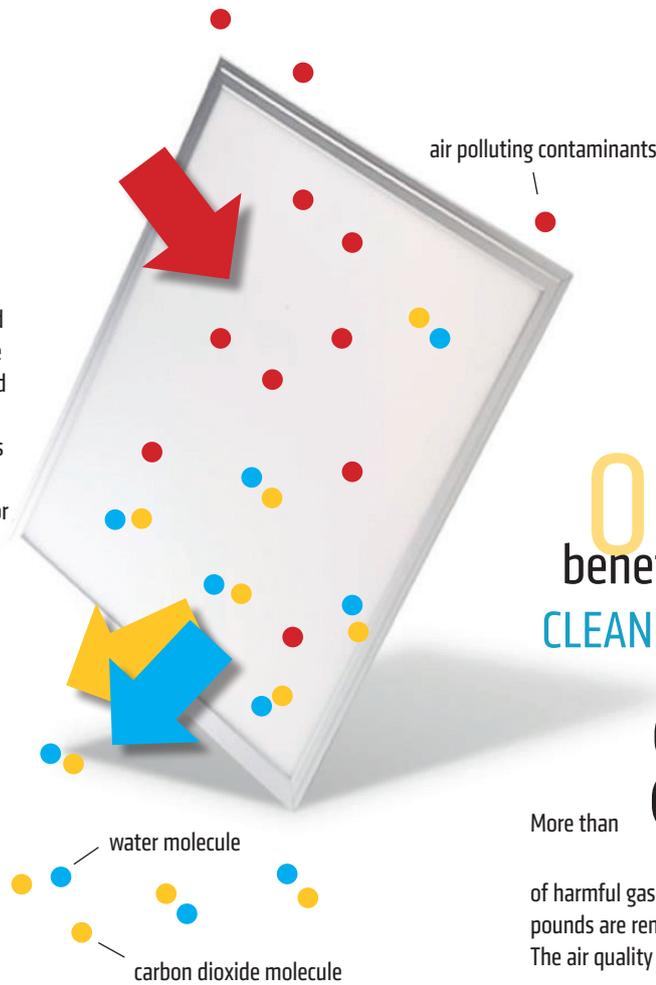

Improve
health &
increase the
quality of work.

01/ operation CLEAN-LED-lights

Fight VOC exposure and symptoms such as headaches, concentration problems, fatigue and breathing difficulties actively with pollution free room air. The CLEAN-LED technology is activated with day light or artificial light. It uses the operating principle of photo catalysis creating pollution free air. It kills bacteria, and so creates hygienically clean air which is ideal for people with allergies.

The CLEAN LED-technology cleanses the air and neutralizes odour.

02/ benefit CLEAN-LED-lights

More than **85%**

of harmful gases and volatile organic compounds are removed from the air effectively. The air quality increases.

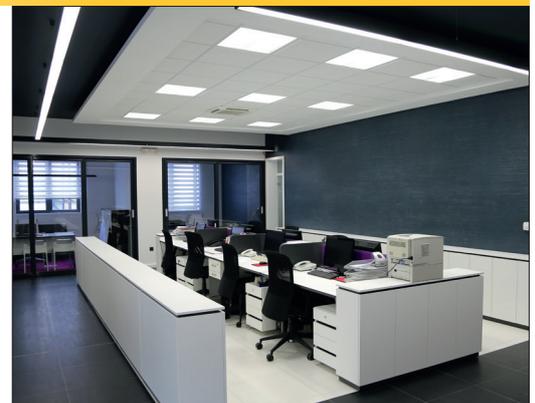

03/ usage CLEAN-LED-lights

Example:
There are EU-limits for agricultural stable complexes regarding the concentration of ammonia gases. By combining lighting and CLEAN-LED-technology existing or new filter systems can be optimized.

hygienic areas

office and public areas

CLEAN-LED by green building standard.

We
bring light
into the
darkness!
